RE: DRAFT FINAL, OU 7 TECHNICAL MEMORANDUM NO. 2, HUMAN HEALTH RISK ASSESSMENT -  
MODEL DESCRIPTION, February 11, 1993

Dear Mr. Schassburger,

The document referenced above has been reviewed by the Colorado Department of Health, Hazardous Materials and Waste Management Division (the Division) and the U. S. Environmental Protection Agency (EPA) and its contractor, PRC Environmental Management, Inc. Comments compiled from these three sources are attached.

Because much of the material in Sections 1 and 2 is repeated from Technical Memorandum No.1, many of the comments made by the agencies on that document also apply to Technical Memorandum No. 2 as well. Some of those comments are summarized in the attached comments for emphasis. Explanations of the model selection process should verify that the selected models are the best of the available choices and that they are able to handle all anticipated contaminants.

The Division and EPA hope to work with DOE and its contractor to expeditiously resolve the concerns raised in these comments. If you have any questions concerning these comments, please contact Carl Spreng of the Division at 692-3358 or Bill Fraser of EPA at 294-1081.

Sincerely,

*Gary W. Baughman*
